

Green Force Hybrid Battery Packs

Green Force®

User Manual

Green Force Hybrid 2

Attention:

- Only use Lithium 18650 batteries.
- Install the batteries as indicated above. Inversion of polarity will damage the light head (not covered by warranty!).
- Do not mix Li-Fe and Li-Ion batteries or chargers!

Charging:

- The charger is equipped with a small light (red : charging - green : charged).
- Only use the charger indoors and do not expose it to humidity.
- Never cover the charger or the batteries while charging the batteries.
- Max. temperature: 40°

Use

- Turn the light head clockwise to switch on the light. Turn the light head counter clockwise to switch off the light.
- Attention:**
- Regularly check condition of sealing O-rings.
 - Clean and grease the sealing O-rings every time the light head is removed.

Green Force Hybrid 4

Batteries:

- Only use 4 Alkaline 1,5 Volt batteries or 4 NiMH 1,2 Volt batteries.

Attention:

- Install the batteries as indicated in the battery holder. Inversion of polarity will damage the light head (not covered by warranty!).
- Do not mix Alkaline and NiMH batteries.

Control of the output

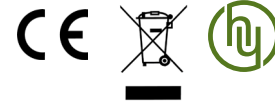

Modes: 100% - 50%

When switching off the light within 5 seconds after it has been switched on, it will pass to the next mode (100%, 50%, 100%, ...) at startup.

If the light remains switched on for more than 5 seconds it'll go to the 100% mode during the next startup.

PULS WIDTH Modulation

Green Force Hybrid 8

Batteries:

- Only use 8 Alkaline 1,5 Volt batteries or 8 NiMH 1,2 Volt batteries.

Attention:

- Install the batteries as indicated in the battery holder. Inversion of polarity will damage the light head (not covered by warranty!).
- Do not mix Alkaline and NiMH batteries.

NiMH Pack

Only the Hybrid 8 can be equipped with a rechargeable NiMH battery pack (2.1 Ah - 12V).

In case a Hybrid 4, 8 or 12 is equipped with rechargeable NiMH AA size batteries, the charger and the charging plug delivered with the rechargeable NiMH pack can be used to charge these NiMH AA batteries.

Green Force Hybrid 8

Attention:

- Only use the Green Force NiMH battery pack.
- Install the batteries as indicated above. Inversion of polarity will damage the light head (not covered by warranty!).

Charging:

- The charger is equipped with a small light (red : charging - green : charged).
- Only use the charger indoors and do not expose it to humidity.
- Never cover the charger or the batteries while charging the batteries.
- Max. temperature: 40°
